Certain statements in this presentation, including statements regarding future results and performance, are forward-looking statements within the meaning of securities legislation based on current expectations. The accuracy of such statements is subject to a number of risks, uncertainties and assumptions that may cause actual results to differ materially from those projected, including, but not limited to, the effect of general economic conditions, decreases in demand for the Corporation’s products, the prices and availability of raw materials, changes in the relative values of certain currencies, fluctuations in selling prices and adverse changes in general market and industry conditions. This presentation may also include price indices as well as variance and sensitivity analyses that are intended to provide the reader with a better understanding of the trends related to our business activities. These items are based on the best estimates available to the Corporation.

The financial information included in this presentation also contains certain data that are not measures of performance under IFRS (“non-IFRS measures”). For example, the Corporation uses earnings before interest, taxes, depreciation and amortization (EBITDA) because it is the measure used by management to assess the operating and financial performance of the Corporation’s operating segments. Such information is reconciled to the most directly comparable financial measures, as set forth in the “Supplemental Information on Non-IFRS Measures” section of our most recent quarterly report or annual report.

Specific items are defined as items such as charges for or reversal of impairment of assets, for facility or machine closures, accelerated depreciation of assets due to restructuring measures, debt restructuring charges, gains or losses on sales of business units, unrealized gains or losses on derivative financial instruments that do not qualify for hedge accounting, foreign exchange gains or losses on long-term debt and other significant items of an unusual or non-recurring nature.

All amounts in this presentation are in Canadian dollars unless otherwise indicated.

Beneficial containerboard price increases; temporary pressures in tissue
OUR BUSINESS DRIVERS – RAW MATERIAL COSTS

Recycled Fiber North American List Prices

US OCC Costs Highly Correlated with Asian Board Market

• Experts estimate Chinese collection rate at approx. 46%
• Will increase as domestic consumption increases

Partially due to harsh weather, brown grades increased by $15/s.t. In March
