DISCLAIMER

Certain statements in this presentation, including statements regarding future results and performance, are forward-looking statements within the meaning of securities legislation based on current expectations. The accuracy of such statements is subject to a number of risks, uncertainties and assumptions that may cause actual results to differ materially from those projected, including, but not limited to, the effect of general economic conditions, decreases in demand for Cascades Inc.’s (“Cascades,” “CAS,” the “Company,” the “Corporation,” “us” or “we”) products, the prices and availability of raw materials, changes in the relative values of certain currencies, fluctuations in selling prices and adverse changes in general market and industry conditions. This presentation may also include price indices as well as variance and sensitivity analyses that are intended to provide the reader with a better understanding of the trends related to our business activities. These items are based on the best estimates available to the Company.

The financial information included in this presentation also contains certain data that are not measures of performance under IFRS (“non-IFRS measures”). For example, the Company uses operating income before depreciation and amortization (“OIBD” which, for purposes of this presentation, we call “EBITDA”) and operating income before depreciation and amortization (excluding specific items) (“OIBD (excluding specific items)” which, for purposes of this presentation, we call “EBITDA (excluding specific items)”) because such measures are used by management to assess the operating and financial performance of the Company’s operating segments. Such information is reconciled to the most directly comparable financial measures, as set forth in the “Supplemental Information on Non-IFRS Measures” section of our most recent quarterly report or annual report.

Specific items are defined as items such as charges for or reversal of impairment of assets, for facility or machine closures, accelerated depreciation of assets due to restructuring measures, premiums paid on long-term debt refinancing, loss on refinancing of long-term debt, gains or losses on sales of business units, unrealized gains or losses on derivative financial instruments that do not qualify for hedge accounting, unrealized gains or losses on interest rate swaps, foreign exchange gains or losses on long-term debt, other significant items of an unusual or non-recurring nature, and all such items included in discontinued operations or in the share of results of our associates and joint ventures.

All amounts in this presentation are in Canadian dollars unless otherwise indicated.

# Potential Benefits Stemming from Our Initiatives

## Modernizing our operating platform to increase profitability
- $185M Capex program in 2016
- Divestitures and closures of under-performing units
- Containerboard: sound fundamentals and improved platform
  - Modernized converting platform and improved manufacturing productivity
  - Greenpac to positively contribute to EPS for a second full year in 2016
- Tissue Papers: strong and growing position in North America
  - Increasing presence in the US with recent expansion initiatives
- Ramp-up and resulting benefits from recent Capex projects

## Other sources of growth and incremental value
- Culture of innovation
- Good performance from European platform and hidden value of Boralex investment
- On-going initiatives to improve our business processes

## Potential tailwinds
- CAD$ weakness
- More stable economic reality in Canada, the US and Europe
- China’s economic weakness and favourable impact on recovered paper prices
- Lower oil and gas costs
- Benefits of recent price increases (2015-2016)
