Our egg packaging
solutions protect
your eggs and
the environment.

The sustainable choice for retailers

With over 55 years of experience in recovery, Cascades knows the full potential of the materials we transform. Choosing us means having access to a host of sustainable solutions to meet all your packaging needs, from farm to plant to store.

With our unique lineup of egg packaging solutions, you can retail your products with a tray and topper for sealed protection or with a dividable and stackable tray to encourage consumers to stock up.

What's more, Cascades' packaging solutions are developed with sustainability in mind. Our egg trays and toppers are made of 100% recycled fibre and are recyclable. Our trays are also certified compostable by the Biodegradable Products Institute (BPI, Certificate # 10528727).

So by using our sustainable egg packaging solutions, not only will you provide your customers with farm-fresh tasting eggs, you'll also show your commitment to reducing your environmental footprint.

Protection you can rely on

Protection you can trust for your eggs

Thanks to its shock- and vibration-absorption capabilities, moulded pulp is the perfect material to offer maximum protection for eggs during transportation, in storage, and at retail. You can rely on our moulded pulp trays to offer excellent fit and protection.

Support you can count on

Cascades' team of innovation and marketing experts is available to assist you with developing the right solution to meet your specific needs. Our plants are strategically located across the Northeast and the Midwest. They offer reliable production capacity that can adapt to market demand.

Standards you can feel good about

Our moulded pulp trays are certified compostable by the Biodegradable Products Institute. The materials used in our egg filler flats are compliant with the Food and Drug Administration (FDA) and Health Canada requirements. And all our distribution facilities are Safe Quality Food (SQF) certified.

Our certifications

STACK GUARD – NEW

Our unique 2 x 12 detachable tray is perforated so it can be separated into two parts, with 12 eggs in each. The parts can then be stacked, saving space in your consumers’ refrigerator and encouraging them to stock up.

North American exclusive

Sealable for tamper-proof protection

100% recycled, recyclable and compostable

Perfect space for a customized label

Holds 24 eggs altogether

Please refer to the table on the reverse side for product specifications.

Detachable into two 12-egg trays

Stackable

TOP GUARD – NEW

Our exclusive egg tray topper can be shrink-wrap sealed, making it a tamper-proof solution for increased food safety and protection.

Sealable for tamper-proof protection

100% recycled, recyclable and compostable

Perfect space for a customized label

Covers 30 eggs

Please refer to the table on the reverse side for product specifications.

Perfect fit

The perfect complement to your operations

Cascades’ shipping boxes are made of recycled cardboard. They are available in a variety of sizes and are customizable.
